

# BENEFITTING THE ENVIRONMENT AND SUPPORTING LOCAL COMMUNITIES

NEWSLETTER  
2023

Her appointment promises positive impacts on our wind farm's beneficiary communities.

## NEW ECONOMIC DEVELOPMENT SPECIALIST

Introducing Nonini Makhothe, the Economic Development Specialist at Klipheuwel Wind Farm. As the vital link between the wind farm and its beneficiary communities, she is dedicated to empowering communities.

With over five years of experience in development and renewable energy, Nonini engages with programme beneficiaries to understand the communities' dynamics.

Nonini's passion for sustainability led her to the wind power sector, believing that renewable energy is the future, contributing to our energy security.

## BURSARY HELPING SMALL COMMUNITIES

With the help of our study bursaries, 30 students across the Overberg region have been awarded bursaries from Klipheuwel Wind Farm.

Luke Alexander Wessels, a Genadendal local, graduated with a Bachelor of Medicine and Bachelor of Surgery (MBChB) and has begun his two years internship, which will be followed by a year of community service.

**"I would love to give back to my community, by having conversations with the youth in Genadendal about the opportunities that are available." - Luke**

## SWARTBERG HIGH SCHOOL WELCOMES THE ENERGY-DRIVE

The engaging educational EnergyDRIVE edu-tainer was warmly welcomed by students at Swartberg High School. They appreciated the interactive exhibits that improved their comprehension of renewable technologies, particularly wind power.

These displays not only raise awareness about renewable energy sources but also tackle important issues connected to climate change. With features like a solar roof structure, biogas digester, a photovoltaic panel showcase, and a solar hot water unit, a visit from the EnergyDRIVE is always enjoyable!
