

# BENEFITTING THE ENVIRONMENT AND SUPPORTING LOCAL COMMUNITIES

NEWSLETTER  
2025

The programme builds valuable skills and shows the incredible potential of our local youth.

## LOCALS GAIN SKILLS AS WIND TECHNICIANS

Nomabathu Siyasanga (32), and Neoentle Maqetela (22), both from Caledon, along with Nozuko Mjeje (35) from Grabouw are now well prepared to step into exciting new careers in wind energy.

The wind turbine training programme builds valuable skills and shows the incredible potential of our local youth, opening doors to meaningful work and a brighter future.

**Accredited by SARETEC and CPUT, the programme combined classroom learning with hands-on experience on site at our wind farm.**

## SMALL BUSINESSES RECEIVE COMPLIANCE HELP

Small businesses in Caledon and Grabouw received support to meet compliance requirements, helping them access funding, tenders, and growth opportunities.

Over 230 entrepreneurs attended supplier open days, where experts from SARS, SEDFA, and NHBRC offered guidance and one-on-one assistance. Held in partnership with the Theewaterskloof Municipality, these events aim to strengthen local enterprises and create sustainable jobs.

**"By bringing these services closer to the community, business owners can become more resilient and contribute to our local economy, demonstrating the power of collaboration between local government and community partners." - Nonini Makhothe, ED Specialist**

## GREYTON'S ECD CENTRES TRANSFORMED

Two ECD centres in Greyton have been upgraded, improving learning spaces for children aged 2–5.

**Greyton Speelsentrum now has more classrooms, child-friendly facilities, and full DBE registration, creating new jobs for the community.**

These upgrades provide children with a safe and stimulating environment while strengthening the long-term sustainability of local early childhood education.
